

Explainability Showcase — Custom EfficientNet V2 (Hub v2, proposed)

Hand-curated samples where GradCAM++ peaks coincide with the visible lesion and LIME contours trace its boundary.

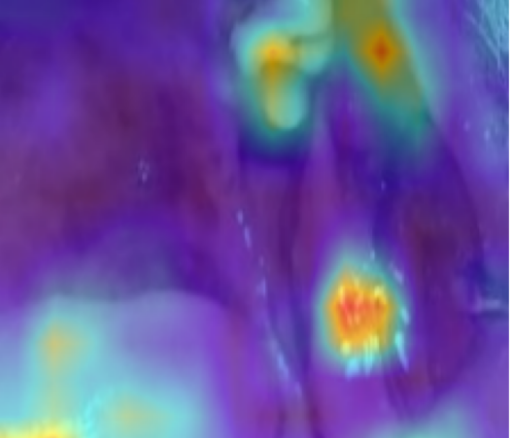

Malignant lesion

Focus: Tight red focal spot on the ulcerated region

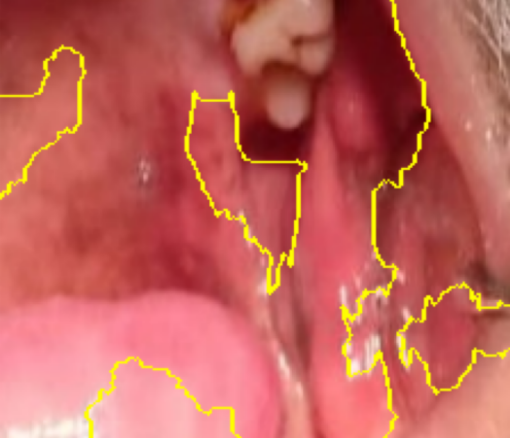

Original

GradCAM++

LIME

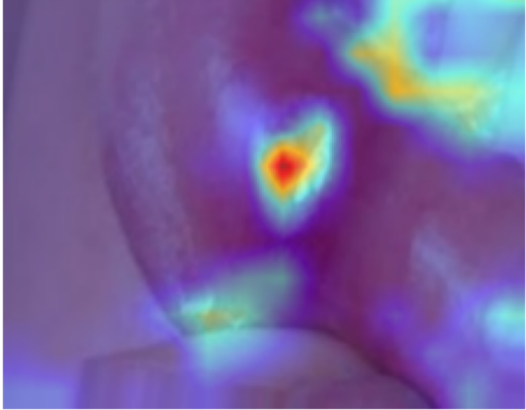

CoS — lip lesion

Focus: Sharp focal heat-map on the herpes-like vesicle

Original

GradCAM++

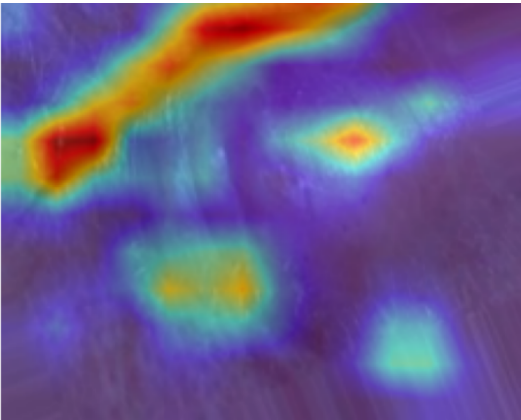

LIME

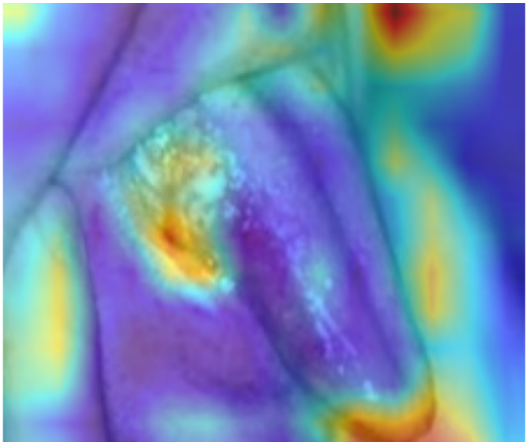

CoS — perioral skin

Focus: Elongated heat-map traces the linear lesion contour

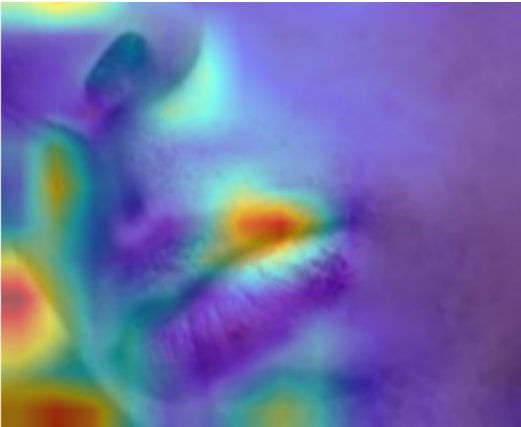

OC — raised tongue lesion

Focus: Strong activation on the papillomatous lesion

Gum — inflamed lip margin

Focus: Heat-map concentrates on the inflamed lower lip

OLP — striations / patches

Focus: Two focal spots align with the visible patches
